Project Design Phase-I Proposed Solution Template

Date	29 September 2022
Team ID	PNT2022TMID38067
Project Name	Digital Naturalist - AI Enabled tool for
	Biodiversity Researchers
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be	To build an efficient AI based image
	solved)	recognition tool which effectively to curb out
		the following constraints:
		To capture the flora and fauna using the AI
		tool
		To provide the information about the flora
		and fauna resp
2.	Idea / Solution description	This system is built by using the Image/object
		recognition and classification using (CNN)
		Convolutional neural network. By using this
		system, we can capture the image of any animals
		and plants and can obtain the information about
		the flora and fauna at any time
3.	Novelty / Uniqueness	This AI powered chatbot gives a 24*7 efficient
		automated so that the service can be used
		anywhere and anytime. This system carries out
		the visualisations of the interpreted results. It also
		provides various information regarding the
		respective flora and fauna.
4.	Social Impact / Customer Satisfaction	The feasibility of implementing this idea is
		moderate neither easy nor tough because the
		system needs to satisfy the basic requirements
		of the customer as well as it should act as a
		bridge towards achieving high accuracy on
		predicting and analysing the image taken as

		input and to deliver the output with respective to
		the input image.
5.	Business Model (Revenue Model)	By using this system, the users can predict and
		analyse the picture of the animals or plants. In
		which it results to the visualizing the description
		of the flora or fauna which taken as input.
6.	Scalability of the Solution	By implementing this system, the people can
		efficiently and effectively to gain knowledge
		about the nature they want and they wish to use
		at anytime. This system can also be integrated
		with the future technologies
